PLANT NOW FOR BEAUTIFUL SPRING FLOWERS

Tulip Planting time is here. Now we make plans for our gay spring garden. In summer our gardens should be quiet and restful but in the spring after long winter months the air is filled with gayety, the gardeners are gay and so should our gardens appear. It would seem that tulips were designed for this purpose; bright, gay and cheerful, they usher in the spring with all its splendor. Plant the spring flowering bulbs freely, in the border, among the shrubbery and in the rock garden. They are easy to grow and their vivid beauty in the spring repays the cost many times over. Bear in mind the hardy bulbs you plant this fall are going to flower not one season only, but three or more.

HOW TO ORDER

Send in your order as early as possible on the enclosed order blank. It will be acknowledged at once and filled just as soon as our bulbs arrive from Holland. Later in the season our stocks may become broken and it will probably be impossible to replace them. Orders for plants will be sent about Sept. 15th, weather permitting. No postage is required as prices include postage. Our terms are cash with the order or we will ship C. O. D., providing one-fourth of the amount accompanies the order.

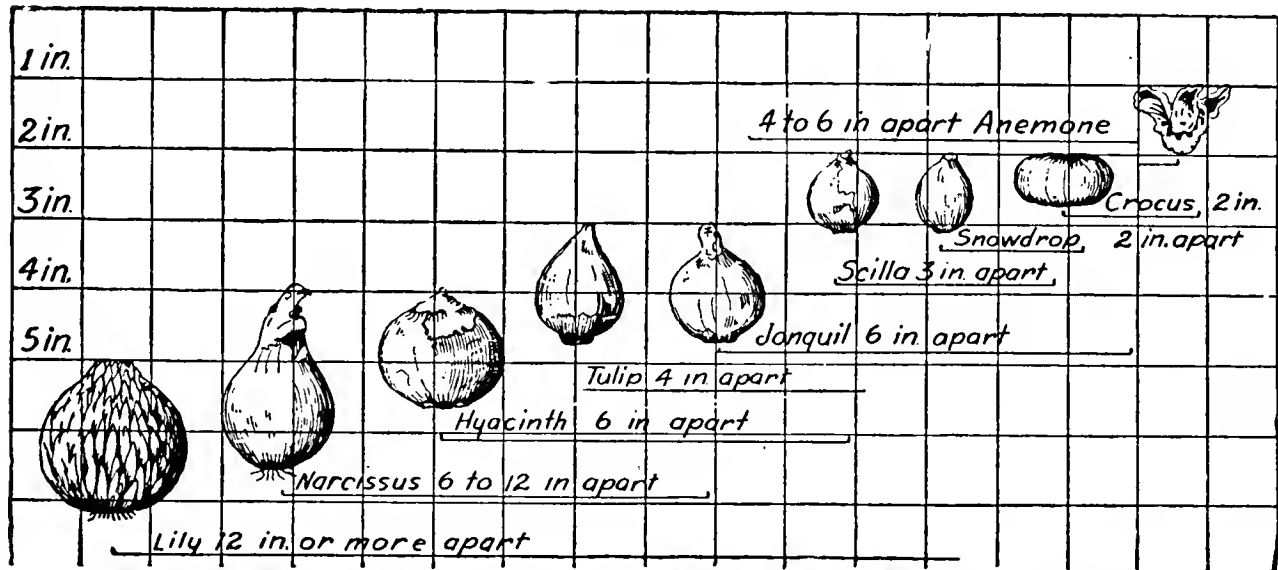

OUR GUARANTEE

We guarantee all bulbs sent out to be of large size, true to name and to arrive in satisfactory condition. If our bulbs are not equal or superior to any bulbs you have purchased or you are not entirely satisfied, they may be returned to us and your money will be promptly refunded. Bulbs and Seeds are planted under varying conditions of soil and climate and we will not be responsible for them after they are planted. Nor do we give any further warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be responsible for the crop.

N. R. A. We have signed the President's Re-employment Agreement and are members of the National Industrial Recovery Act.

HOW TO PLANT

Plant only the finest quality bulbs. Olds' Bulbs are the best that can possibly be secured. They have a reputation for large flowers and uniformity of size and color. Tulips should be planted in the open ground as early in the fall as possible, as this gives them time to make suitable root growth before freezing weather. They can be planted right up to the time the ground freezes, but with late plantings it is necessary that a very heavy application of mulch be placed over the beds. All bulbs should be planted to the depth shown in the diagram. Set the bulbs firmly, taking care not to leave an air space at the base of the bulb where water will settle and cause the bulb to rot. Choose a well drained location. If you do not have a suitable place raise the bed about six inches for good drainage. Bone Meal is the only fertilizer to use. It should be applied at the rate of two handfuls to the square yard. Cover the bed after the ground freezes with some form of mulch. This is not to keep the bulb from freezing but to keep the ground frozen until danger of frost is over in the spring.

This diagram shows you the depth and distance apart to plant bulbs

SPECIAL EARLY ORDER OFFER

With every order for bulbs amounting to \$2.00 or more, received before Oct. 15th, we will include free one dozen Scillas or one dozen Grape Hyacinths. Please state your choice. Send your order early and take advantage of this special offer.

A Border of Olds' Darwin Tulips.

EARLY FLOWERING SINGLE TULIPS

Grand Duke or Keizerkroon.

FIRST TO BLOOM

Olds' Early Tulips grow about seven to ten inches tall, are entirely hardy and bloom two weeks earlier than Darwin or Cottage Tulips. They usually blossom in April, continuing for a period of two to three weeks. These dauntless leaders in the season's procession of bloom, gaily put forth their valiant colors while most plants still are dormant.

Though not as tall as the later varieties, early tulips rival them in brilliance of color, and frequently in size also.

GORGEOUS GIANT DARWIN TULIPS

FOR LARGER AND FINER FLOWERS USE BONE MEAL

The best and only fertilizer to use on fall bulbs and peonies is Bone Meal. Apply at the rate of two handfuls to the square yard. Rake it into the soil evenly so that it does not come into direct contact with the bulbs. For prices see page 21.

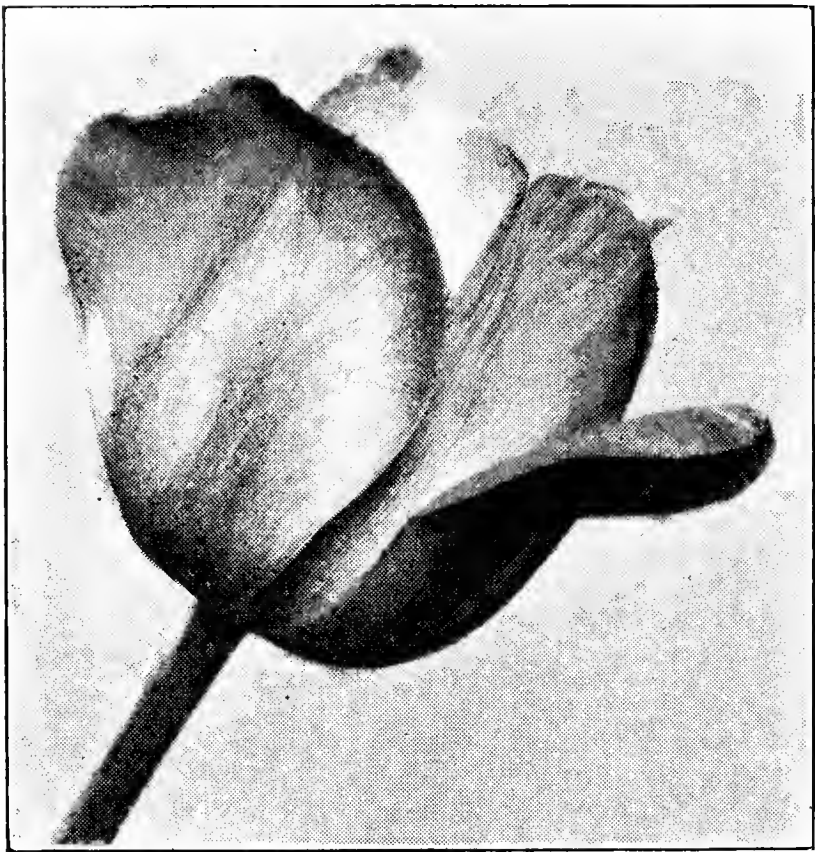

PEAT MOSS.

Peat Moss makes the finest mulch for plants and bulbs that we know of. It does not mat down and choke the plants as leaves have a tendency to do, nor will it bring weeds into your garden as is often the case when you use hay or straw. Furthermore, Peat Moss will improve your soil; it is especially fine for heavy clay soils and light, sandy soils.

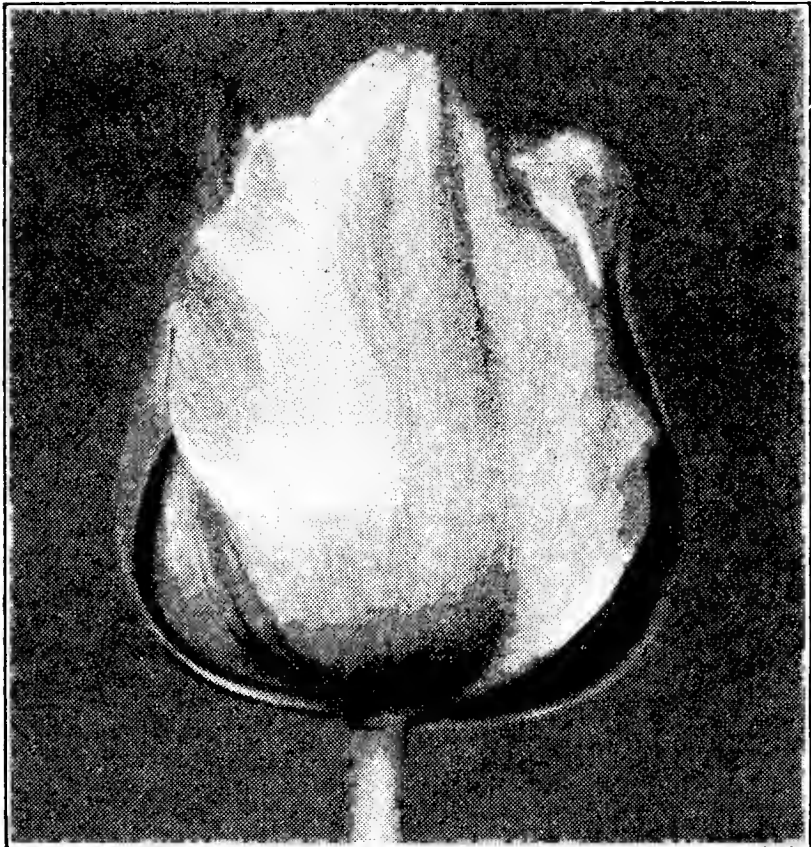

A further use for Peat Moss is in the Rock Garden. It is difficult to keep the weeds out of a Rock Garden and as most Rock Gardens are built on a slope heavy rains will wash the soil. A good application of Peat Moss will check the weed growth and will also help to prevent the soil from washing.

OLDS' OLD DUTCH BREEDER TULIPS

MANY RARE SHADES

This fine, old May-flowering type of Tulip has been neglected for many years, but is again becoming popular; in fact, Breeder Tulips have, for the past two or three years, been given great prominence in many of the strictly up-to-date gardens.

They are very similar to the Darwins in their tall growth, and have even larger flowers. They bloom about the same time, but have an entirely different range of colors, comprising bronze, terra-cotta, orange brown and other artistic tones altogether wanting in the Darwins.

Bronze Queen. Soft golden bronze. Prices: 6 for 30c; 12 for 55c; 100 for \$3.85, postpaid.

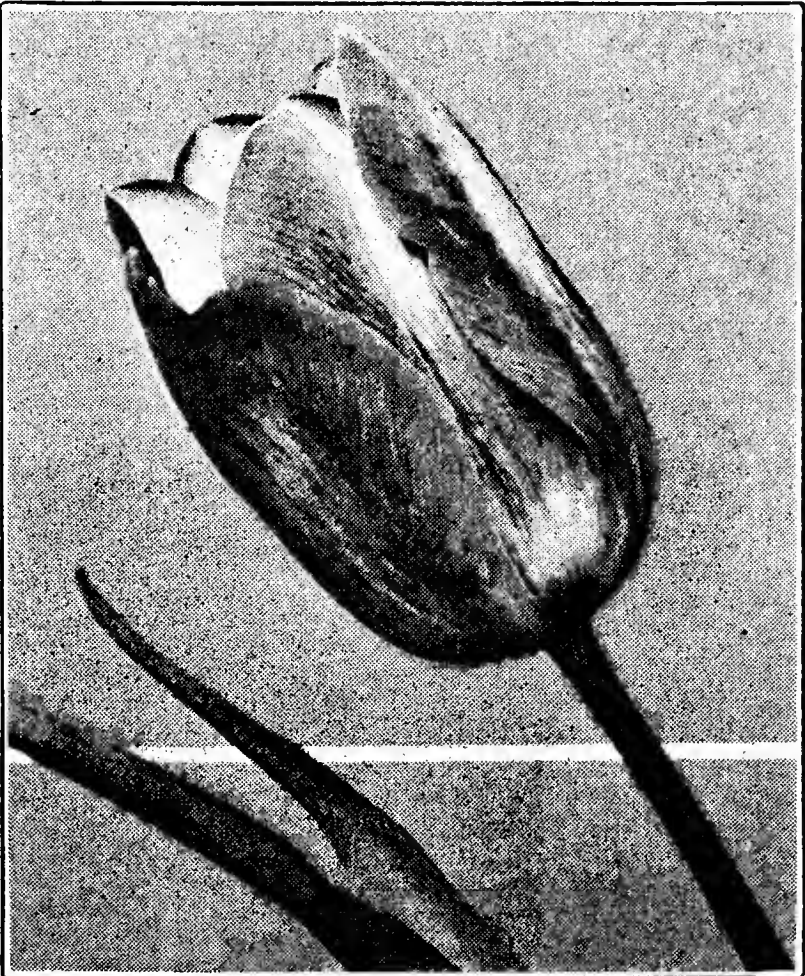

Cardinal Manning. Rosy violet. Prices: 6 for 30c; 12 for 55c; 100 for \$3.85, postpaid.

Don Pedro. A beautiful cocoa brown shading to mahoon. Inside a rich mahogany. Prices: 6 for 35c; 12 for 65c; 100 for \$4.50, postpaid.

Louis XIV. A wonderful variety, very large goblet-shaped flowers of bluish purple with golden-brown margin, now offered at less than one-fourth the usual price. Prices: 6 for 35c; 12 for 60c; 100 for \$4.20, postpaid.

Panorama or Fairy. One of the best. Flowers of large size; deep orange or terra-cotta shaded mahogany. Prices: 6 for 30c; 12 for 55c; 100 for \$3.85, postpaid.

Olds' Special Mixed Breeders. A choice blending of all the finest Breeder Tulips. Prices: 6 for 30c; 12 for 50c; 100 for \$3.50, postpaid.

BOTANICAL OR WILD TULIP SPECIES

Botanical Tulip, Clusiana, in the Rock Garden.

Botanical or Wild Tulip species are recommended for rock gardens and hardy plant borders. The general characteristics of these are bright colors and recurved petals.

KAUFMANNIANA. (Water Lily Tulip.) This tulip resembles a water lily in shape; large creamy flowers brilliantly marked with carmine, yellow center. The flower opens flat and is carried on a stem less than one foot in height. Blooms early in April. Splendid for naturalizing in a shady nook. Prices: 6 for 45c; 12 for 80c; 100 for \$5.50, postpaid.

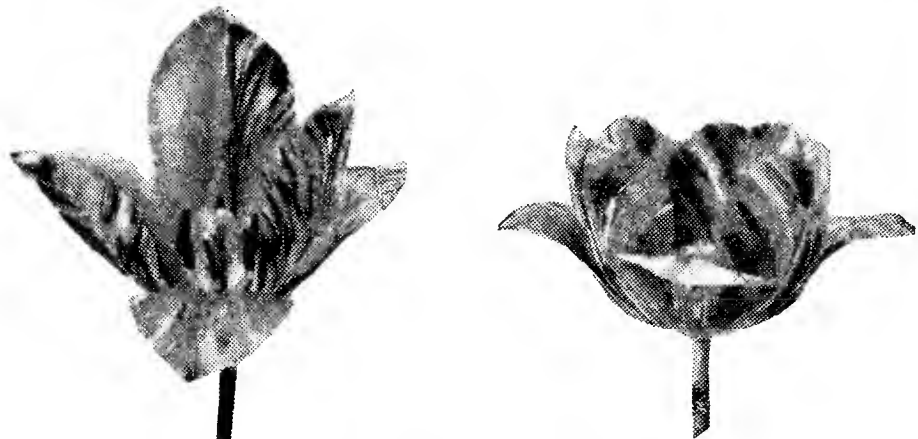

CLUSIANA. (Candy Stick Tulip.) Outer petals bright cherry red and inner petals creamy white with violet base. Small flower but very distinct. Plant in warm, sheltered location. They will prove a gem among early flowers. The flowering season is late April and it grows to a height of about 8 inches. Prices: 6 for 50c; 12 for 90c; 100 for \$6.20, postpaid.

Olds' Cottage Tulips

Cottage Tulips, like the Darwins and Breeders, flower during May outdoors. The flowers have distinct colors, with oval or pointed petals.

Mrs. Moon. The finest late, yellow tulip thus far introduced; blossoms long and pointed, petals reflexed, fragrant and borne on thirty-inch stems. Prices: 6 for 35c; 12 for 65c; 100 for \$4.50, postpaid.

Maiden's Blush. Long, lily-shaped flowers of ivory-white, tipped and edged with rose which gradually deepens. One of the finest. Prices: 6 for 35c; 12 for 60c; 100 for \$4.20, postpaid.

Olds' Rembrandt Tulips.

Olds' Rembrandt Tulips

Rembrandt Tulips have long stems with large flowers and they bloom at the same time as the Darwins. They are really broken forms of Darwins, the difference being in their unique color; the flowers are striped and variegated. Too gaudy to plant alone in large beds but beautiful planted in with other tall tulips.

Olds' Special Mixed Rembrandt Tulips. Prices: 6 for 45c; 12 for 85c; 100 for \$5.80, postpaid.

Olds' Parrot Tulips.

GIANT BLOSSOMING HYACINTHS

The Hyacinth is the most formal of the Dutch Bulbs and the most highly perfumed. Carefully grown in the indoor window garden, Hyacinths reach a perfection of color and bloom that marks them as one of the finest products of the gardener's art. Only large bulbs such as we offer in our named varieties and "Finest Mixed" should be used for forcing, but for outdoor growing in beds or borders the medium sized bulbs in our "Special Bedding Mixed" are satisfactory.

CULTURE

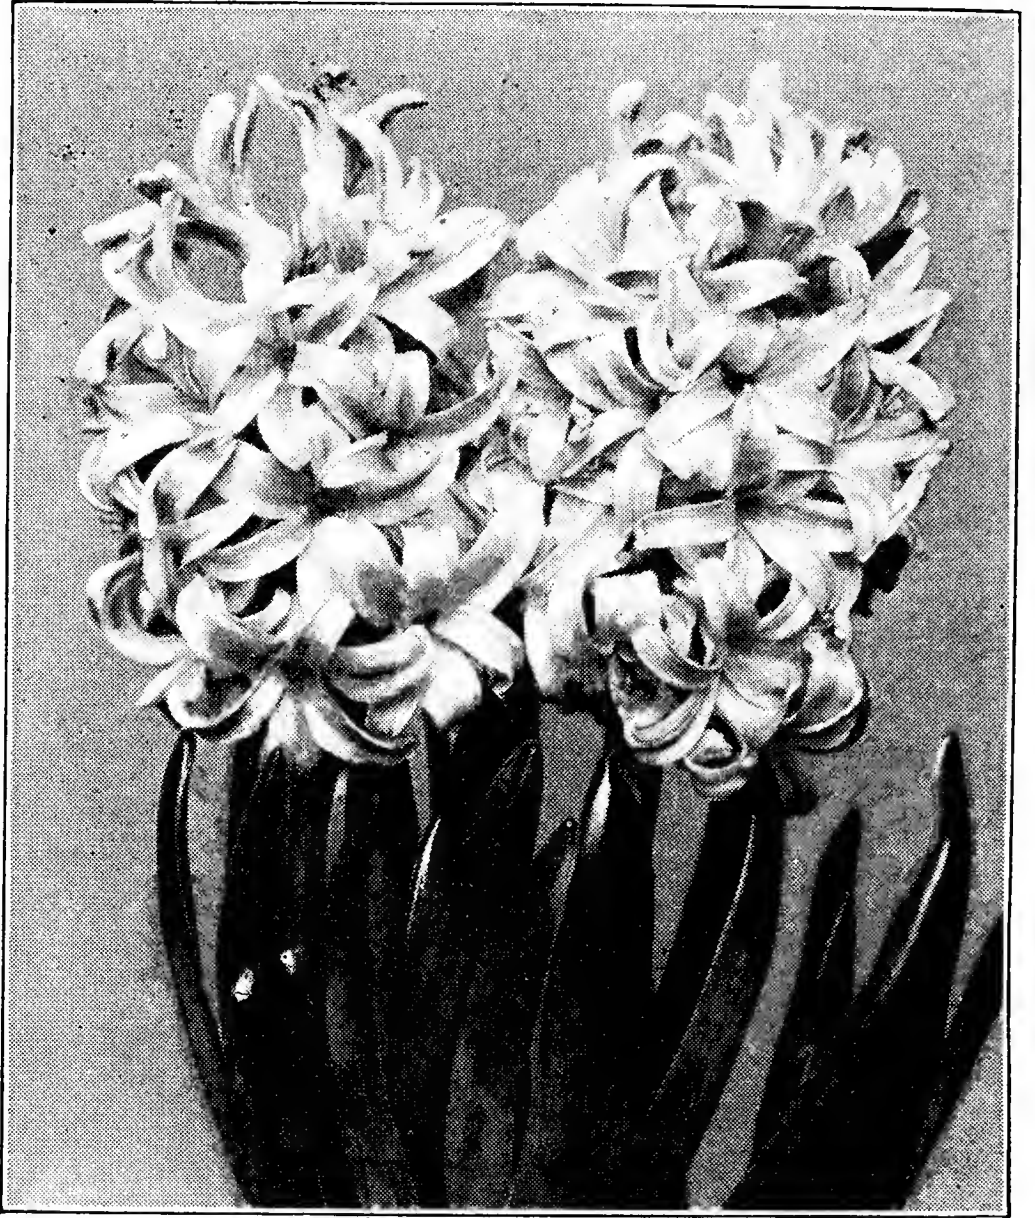

For Outdoor Planting. The 16 and 17 centimeter bulbs are the most satisfactory sizes to use for outdoor planting. Smaller bulbs are often offered but we do not recommend them. Select a well drained location and spade to a depth of 12 inches, plant the bulbs according to the diagram shown on page 2. Bulbs may be planted up to the middle of November but it is best to plant just as soon as you receive the bulbs.

Hyacinths seem to do particularly well planted a short distance from the foundation of the house on the east and south exposure.

Cover the bed well with mulch as soon as the ground becomes frozen.

For Indoors. Use only the largest size bulbs such as our 19 centimeter size, pot 1 bulb in a five-inch pot, or 3 in a six-inch pot. Place a piece of broken pot or a stone over the hole in the pot; then practically fill the pot with rich, light soil, break off all the shoots from the main bulb and place in the soil so that the top will be about one inch from the top of the pot; then fill the pot with soil up to one inch from the top, water well and set in a cool, dark place. After 6 to 10 weeks they can be brought to the light.

Hyacinths can also be forced in water but usually not as satisfactorily. Fill the glass with water so that it nearly touches the bulb. Place a piece of charcoal in the water to keep it sweet, put away in a cool, dark place until roots are about 8 inches long and then gradually bring to the light.

MISCELLANEOUS SPRING FLOWERING BULBS

THE FIRST FLOWERS OF SPRING.

Olds' Giant Crocus.

Crocus

These bright and fascinating little flowers are the earliest of all. The snow has hardly disappeared before they thrust their pretty blossoms through the cold ground in answer to the first warm sunshine of spring.

Although most showy when massed in big beds or planted in rows of distinct colors, they are also very effective sprinkled over the lawn and among the trees and shrubbery.

We offer the following separate colors of Crocus:

	12	25	100
White, Yellow, Blue and Striped.....	\$0.30	\$0.55	\$2.00
Mixed Colors27	.50	1.90

Scilla.

SCILLA SIBERICA (Wood Hyacinth)

A beautiful class of small bulbs with blue bell-shaped flowers following the Crocus in season. Fine for rock gardens, wild flower gardens and borders. They may remain undisturbed for several years. Very easy to grow. Should be occasionally enriched with a top dressing of well rotted manure. Mammoth bulbs. Price, 12 for 40c; 25 for 75c; 100 for \$2.80.

Grape Hyacinths.

GRAPE HYACINTHS (Muscari)

Every lover of flowers should have these beautiful early-flowering bulbs in his garden. They come in blues and whites, and derive their name from their appearance, "like a bunch of grapes." They are very easy to grow and will come year after year if foliage is allowed to ripen. Plant the same as Scillas. Price, Blue, 12 for 35c; 100 for \$2.25. White, 12 for 40c; 100 for \$2.80.

Snowdrop.

SNOWDROP (Galanthus)

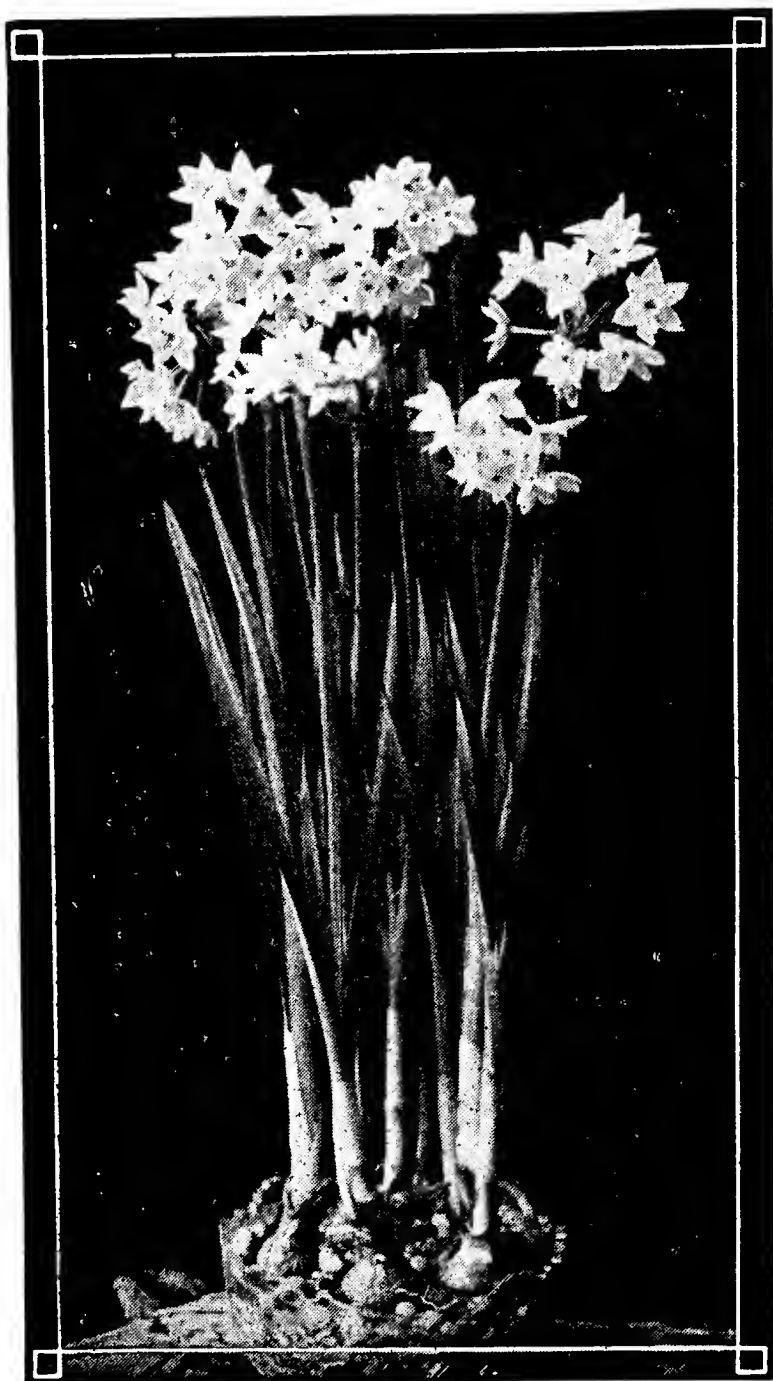

Snowdrops are the beautiful little white bell-shaped flowers that bloom early in the spring before the snow is hardly off the ground. They will make a nice showing in your rock garden. 12 for 40c; 25 for 75c; 100 for \$2.80.

OLDS' ROCK GARDEN COLLECTION OF SPRING FLOWERING BULBS

A Rock Garden is not complete without a few early flowering bulbs. We are listing below a collection of bulbs suitable for the Rock Garden:

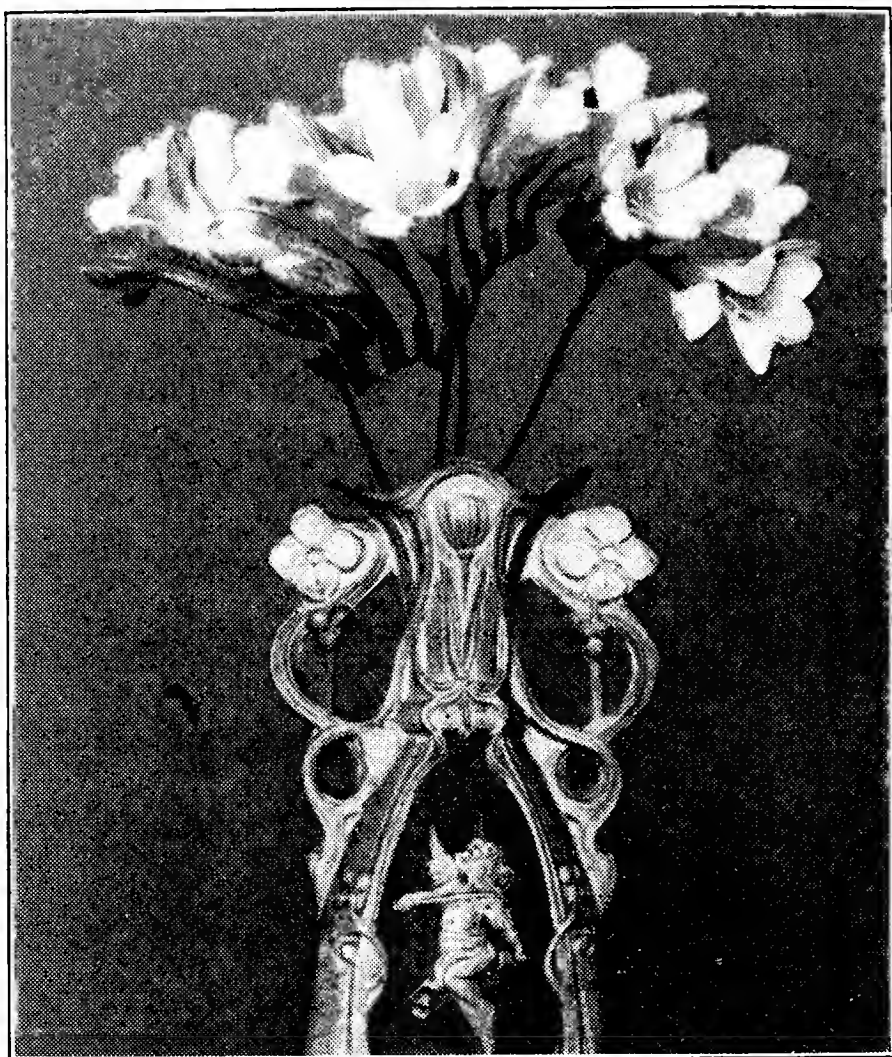

6 Mixed Single Early Tulips; 6 Botanical Tulips, Kaufmanniana; 6 Botanical Tulips, Clusiana; 12 Scilla, blue; 12 Grape Hyacinths, blue; 12 Snowdrops; 12 Mixed Crocus. 66 Bulbs for \$1.75, postpaid.

FLOWERING BULBS for INDOOR GARDENS

Paper White Narcissus.

(Note Hyacinths and Narcissus pages 7 and 8 for indoor gardens.)

Freesia, Giant Purity.

FREESIA, GIANT PURITY

FREESIA. Giant Purity. Glistening white fragrant trumpet-shaped flowers borne in rows of bent stems. Just plant half a dozen of them in a five-inch pot in September and keep outside until danger of frosts. Bring indoors and place in the sunny window of a fairly cool room. 6 for 15c; 12 for 25c, postpaid.

POLYANTHUS NARCISSUS

PAPER WHITE GRANDIFLORA. The finest winter forcing bulbs. Great clusters of pearly-white, sweet-scented flowers on long, slender stems. Sure to bloom, grown in either earth or water. Make plantings every two weeks up to February first. Our bulbs are all 14 ctm. or larger. Do not plant the smaller sizes as they do not give satisfaction. Each, 10c; 3 for 20c; 12 for 65c; 25 for \$1.25; 100 for \$4.00.

HARDY LILIES

The beautiful fragrant Lilies are considered by many too difficult to grow. However, the hardy varieties which we list are no harder to grow than a tulip. They blossom in mid-summer when fine flowers are most welcome.

CULTURE. The soil should be spaded thoroughly 15 to 18 inches deep. Do this early in the fall as lilies cannot be moved until late and it is hard to work the ground late in the season, especially after we have had light frost. Enrich the soil with leaf mold and well rotted manure in equal proportions. Set the bulbs 4 to 8 inches deep, depending on the size, tilting to a 45 degree angle. To insure good drainage pack sand around the bulb. Place about four inches of mulch over the bed.

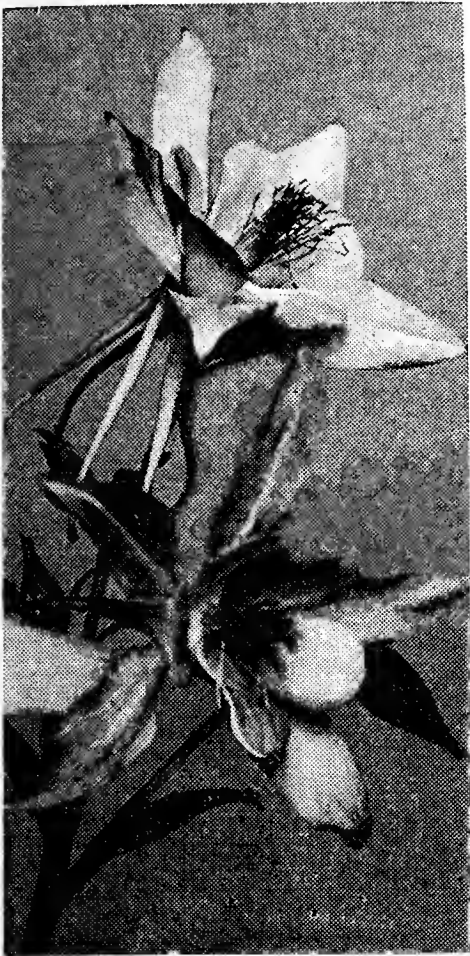

Madonna Lily.

LILIUM CANDIDIUM OR MADONNA. Plant about the first of October. They grow to a height of two to three feet and bloom about the first of July. Sometimes as many as 20 blooms are borne on a plant. Our Madonna Lily bulbs are extra large and measure from 26 centimeters up in circumference. They are grown for us in northern France and are the thick petaled variety. Prices, 25c each; 3 for 60c; 6 for \$1.10; 12 for \$2.00.

OLDS' PEONIES FOR FALL PLANTING

In Japan they call the peony the "King of Flowers" and its splendid, massive and richly colored blossoms justify this title. As hardy as an oak, thriving equally well in sun or partial shade. Well worth growing for its wealth of ornamental foliage alone. The roots we offer are large three to five-eyed divisions and will usually bloom the following spring. Our prices are postpaid. Too deep planting often is the reason why peonies fail to bloom. The eyes should not be more than two inches below the surface.

High Grade Seed Makes a Thick, Velvety Lawn.

OLDS' LAWN GRASS

LAWN GRASS CAN BE SOWN IN THE FALL. In fact, some of the best authorities say fall is the best time to make new lawns and reseed old ones. Nature does its seeding in the fall. In the cool, moist fall weather grass seed germinates quickly and grows steadily until the ground freezes. Sow any time from August 15th to September 20th. Use seed freely, at least a pound for every 250 square feet. Water frequently if dry.

Olds' Lawn Grass has won a reputation. We offer four very fine mixtures varying in price according to the amount of highest priced seed used. None of them contain timothy and none are cheap mixtures.

It is poor economy to sow cheap, light weight lawn grass such as is offered in many stores. The price is low enough this year anyway, even for the best seed.

OLDS' MADISON PARKS LAWN GRASS

Olds' Madison Parks Lawn Grass is a very carefully prepared mixture of high grade, heavy seed, that has been used extensively for several years in the parks about Madison. The seed is composed of White Dutch Clover, Creeping Bent, Rough Stalked Meadow, Chewings' Fescue, Fancy Red Top, Fancy Kentucky Blue Grass and others mixed in proper proportion. We recommend Madison Parks Lawn Grass as our best lawn mixture.

By mail: Lb., 40c; 3 lbs., \$1.10. By freight: Lb., 35c; 5 lbs., \$1.60; 10 lbs., \$3.00; 100 lbs., \$26.00.

WISCONSIN SHADY MIXTURE

A new mixture recommended by Prof. Aust. Rough Stalked Meadow, a fine grass that has proven wonderfully successful in dense shade, is very largely used in this mixture. The mixture also contains other high priced grasses that are specially adapted to shaded locations. There is an increasing demand for a lawn grass that will really do well in the shade. We recommend this.

By mail: Lb., 45c; 3 lbs., \$1.25. By freight: Lb., 40c; 5 lbs., \$1.80; 10 lbs., \$3.50; 100 lbs., \$30.50.

OLDS' CAPITAL LAWN GRASS

Olds' Capital Lawn Grass is made up of substantially the same grasses and the same grades of seed that were used to make the beautiful lawn surrounding Wisconsin's magnificent Capitol building here at Madison. It is composed of heavy seed of the highest germination but contains no White Clover.

By mail: Lb., 35c; 3 lbs., 95c. By freight: Lb., 30c; 5 lbs., \$1.30; 10 lbs., \$2.50; 100 lbs., \$21.00.

OLDS' OLD GOLD LAWN GRASS

A good mixture at a low price. We have been making it for years and it has given general satisfaction. This mixture will probably make a better showing the first year than any of the others.

By mail: Lb., 30c; 3 lbs., 80c. By freight: Lb., 25c; 5 lbs., \$1.15; 10 lbs., \$2.10; 100 lbs., \$17.50.

PULVERIZED SHEEP MANURE.

A pure natural manure taking effect immediately. Very rich in nitrogen, phosphoric acid and potash, the three essentials. Splendid for lawns, greenhouse plants, market garden crops of all kinds and fruit trees.

Prices: 5 lbs., 35c; 10 lbs., 45c; 25 lbs., 65c; 50 lbs., \$1.15; 100 lbs., \$2.00; 500 lbs., \$9.00; 1,000 lbs., \$16.50; 2,000 lbs., \$32.00. (Prices do not include postage.)
